

# Progent™

## Hornetsecurity Certified Partner

## ProSight DPS 365 Total Backup

### *ProSight Data Protection Services 365 Total Backup: Hornetsecurity/Altaro Microsoft 365 Backup and Restore Services*

365 Total Backup services (formerly Altaro Office 365 Backup) from Hornetsecurity provide automated backup and fast recovery of all your Microsoft 365 mailboxes, Teams Chats, SharePoint document libraries, and OneDrive files. Progent is a Hornetsecurity partner and offers

*ProSight DPS 365 Total Backup* to provide managed services for 365 Total Backup. *ProSight DPS 365 Total Backup* offers a low-cost solution that guards M365 files against data loss or corruption that may result from human or software error, malicious users, and malware like ransomware.

#### Key Features of ProSight DPS 365 Total Backup

- **Microsoft 365 mailbox backup:** Back up M365 user and group mailboxes. You can back up emails, file attachments, calendars and contacts from any user's mailbox. You can restore complete user and group mailboxes or perform item-level recoveries.
- **SharePoint backup:** Transparently back up files stored on SharePoint sites and recover files to a ZIP archive or back to a SharePoint document library.
- **Teams backup:** Back up Teams user and group chats as well as any attachments shared in the course of chats, meetings, and team channel conversations. You can also protect recordings of meetings and code snippets. You can restore complete Teams Chats for users and groups to an HTML file or to a new Team. You can pick specific individual or group Team Chat threads for selective restoration.
- **Microsoft OneDrive storage backup:** Back up data residing on a user's OneDrive storage account and restore either to the OneDrive account or to a downloadable ZIP archive.
- **Granular recovery point objective (RPO):** You can schedule backups of Microsoft 365 data to occur up to four times per day, offering a small recovery point objective window to minimize data loss.
- **Searchable and browsable backups:** Backups are searchable and browsable using a library of filters, enabling you to find protected data rapidly and recover it accurately.
- **Comprehensive auditing:** Review a variety of events like users activating and turning off protection for mailboxes, Microsoft Teams, OneDrive storage, and SharePoint; their browsing history; and requests for data recovery. Audit data can be exported as required.
- **Advanced security:** Supports military-grade AES-256 encryption and two-factor authentication.
- **Unlimited storage and point-in-time restore:** Microsoft 365 OneDrive for Business and SharePoint Online limit point-in-time restores to a maximum of 30 days. The 365 Total Backup allows for unlimited retention of point-in-time Microsoft 365 backups.

#### How Progent Can Help Your Business Benefit from ProSight Altaro VM Backup
