

Exchange 2013 Migration Support

Certified expertise to help you migrate quickly and affordably to Microsoft Exchange 2013 from older versions of Exchange

Exchange 2013 builds on the successful architecture of Exchange Server 2010 and introduces key design changes that improve performance and availability, cut hardware and operating costs, strengthen security and compli-

ance, improve backup, and streamline management. But these enhancements call for special care in planning a migration and require close adherence to best practices in deploying Exchange 2013.

Progent's Microsoft-certified IT consultants, senior project managers, and security experts have experience helping companies ranging from small businesses to large enterprises upgrade to Exchange 2013. Progent can help you assess the business advantages of Exchange 2013, plan and execute a smooth migration, and troubleshoot technical issues. Progent can also help you integrate Exchange 2013 with Lync 2013 and SharePoint 2013 for state-of-the-art collaboration and enterprise search capabilities.

Progent can advise you how to pick the edition of Exchange 2013 that makes the most sense for your company and can help you design and implement an in-house, cloud, or hybrid environment. Progent also offers hosting services. Whatever architecture you choose, Progent can provide expertise for every phase of your Exchange 2013 migration including site inventory and preparation, cost estimates, project management, sourcing recommendations, and virtualization. You can outsource all migration services to Progent or co-source services with your in-house IT staff.

Progent's Support for Key Exchange 2013 Technologies

Exchange 2013 includes major design changes that include a reduction in server roles to improve system resilience and simplify updates, layer 4 load balancing to lower costs and increase functionality, a new public folder architecture that enhances availability, the web-based Exchange Management Console (EMC) to replace multiple administration utilities, an array of powerful new auditing capabilities for easier compliance, plus new versions of Outlook and Outlook Web Access (OWA) to support the latest tablets, smartphones, and touch-screen laptops. These changes present challenges in the migration process and require you to learn new management tools and procedures. Progent can help you understand these new technologies so your Exchange 2013 deployment adds maximum business value to your IT network.

On Line Consulting Experts

Progent specializes in delivering advanced consulting solutions online and Progent's Microsoft-certified experts have provided cost-effective remote solutions to companies in every state in the U.S. Progent's clients include large enterprises, ISPs, local and state governments, small and mid-size businesses, and home offices. Remote support saves travel costs, resolves problems faster than onsite service, and streamlines the coordination of large project teams. Progent also offers on-premise support in major metropolitan areas throughout the U.S.
