Computer Audit

March 27, 2018

Report Legend

Identification

Displays a list of information used to identify this specific computer: Client Name, Location Name, Computer Name, Friendly Name, Domain, Last User to login, and Asset Tag.

Hardware Information

Displays summary information about the current computer's hardware: Manufacturer, Product Model, Chassis Type, Processor, Memory, Video card, monitor counts, peripheral device counts, chassis sensor counts, and printer data.

Drive Information

Displays summary information about the current computer's drives: counts of drive types, used space, and drives with SMART errors.

Network Information

Display's information about the computer's network connection(s): Primary IP address, router address, gateway address, and Primary MAC address.

Latest Performance

Displays the computer's latest CPU, RAM, and internal HDD usage as of the computer's last checkin. Each bar's icon indicates the type of usage data:

CPU/Processor

RAM/Memory

Internal Drive

Service History

Displays a summary of service history dates for the computer: Date added to LT, Date OS first started, Date of last status, and Date last contacted.

Software Summary

Displays a summary of software information for the computer: the current operating system, counts of applications, app classifications, startup items, services, and processes.

Patch Summary

Displays a summary of patch information for the computer: the date and time the computer was last scanned for patch updates; the date and time the computer was last patched; the Windows Update Agent version; and counts of the number of patches approved, installed, missing, and failed.
