

SharePoint Server and SharePoint Online Solutions

SharePoint on-prem, cloud, and hybrid solutions: planning, integration, programming, and troubleshooting

SharePoint

Progent has delivered advanced consulting expertise for Microsoft SharePoint for two decades and has worked with every release since SharePoint 2001. Progent's Microsoft-certified SharePoint experts offer affordable remote and onsite consulting for every aspect of your SharePoint ecosystem including system design, deployment, development, management, tuning, troubleshooting, security, and training.

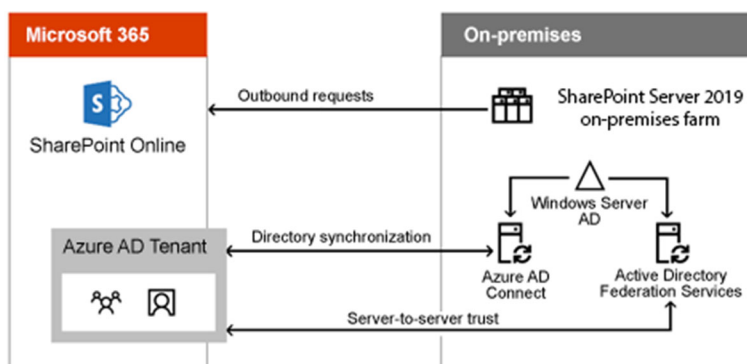

Progent can help you plan and execute an efficient migration from an older version of SharePoint to SharePoint Server 2019 on prem, to SharePoint Online, or to a hybrid environment combining local and cloud-based resources for a unified intranet and content management solution. Progent's consultants offer services ranging from occasional guidance and debugging to comprehensive project management.

Progent can help you configure SharePoint server farms, intranets, extranets, sites, portals, blogs, wikis, data warehouses, BI and analytics, federated search, and workflows. Progent can also help you integrate SharePoint with Windows Server, SQL Server, Exchange, Power BI, and the Office family of applications like Outlook, Excel, OneDrive, PowerPoint, Access, and Teams.

Deployment Models for SharePoint Server 2019 and SharePoint Online

Progent can help you plan and implement SharePoint and/or SharePoint Online in several models:

- On-premises or in a private cloud with SharePoint Server
- As an IaaS service in a public cloud like Microsoft Azure with SharePoint Server
- As an SaaS service with Microsoft 365 SharePoint Online
- In a hybrid architecture combining SharePoint Server on-prem with SharePoint Online cloud services

Services available from Progent to help you move to a modern deployment of SharePoint include:

- Migrate older versions of SharePoint Server to SharePoint Server 2019
- Use the SharePoint Migration Tool for moving from SharePoint Server to MS 365 SharePoint Online
- Set up My Sites, User Profiles, Managed Metadata, and Search to operate in hybrid mode
- Set up a trust framework for SharePoint in Microsoft 365 and SharePoint Server

For more information, call **1-800-993-9400** or send email to **information@Progent.com**

SERVICES

- Move to SharePoint Server 2019 from an older on-prem version of SharePoint Server
- Move your SharePoint Server deployment to Microsoft 365 SharePoint Online
- Implement a hybrid architecture that integrates SharePoint Server 2019 with MS 365 SharePoint Online
