

Windows Server 2016 Integration Consulting

Online and onsite expertise to help you build and manage on-premises, cloud-based or hybrid solutions with Microsoft Windows Server 2016

Windows Server 2016

Windows Server 2016 incorporates the core technology behind the world's largest cloud datacenter and makes it available to organizations of any size for creating in-house networks, private clouds, or hybrid systems.

Most businesses today combine local and cloud resources to achieve the right balance of control and economy needed to optimize productivity, meet security and compliance requirements, and contain the costs of IT management and operations. Windows Server 2016 is a cloud-smart operating system that is ideal for hybrid network models. It brings a wealth of new and improved features that cover key areas of information technology including security and assurance, server and desktop virtualization, availability and disaster recovery, management automation, resource utilization, scalability and performance.

Progent's nationwide team of Microsoft Gold-certified consultants, project managers and security experts have experience helping companies migrate to Windows Server 2016. We can assist you to evaluate the benefits of Windows Server 2016 for your business, design and implement a smooth upgrade plan, and provide prompt and efficient follow-up support. Progent can also help you integrate Windows Server 2016 with the latest releases of key Microsoft platforms like Exchange 2016 and SQL Server 2016.

Progent can help with any phase of your Windows Server 2016 migration including solution design, site prep, project planning and management, pilot testing on premises or at Progent's test lab, virtualization architecture and deployment, cloud integration, and IT staff training. Progent can provide as-needed help with occasional technical roadblocks or full project management outsourcing or co-sourcing services.

Examples of Progent's Windows Server 2016 Integration Services

Progent has experience providing a broad range of Windows Server 2016 integration services including:

- Setting up Hyper-V Containers for secure isolation of applications
- Integrating server clusters with improved resiliency against network and storage failures
- Assigning critical applications priority access to storage with Storage Quality of Service (QoS)
- Deploying System Center 2016 for centralized, streamlined management of hybrid environments
- For multi-OS deployments, configuring Hyper-V to support all major Linux distributions and apps

Online Consulting Experts

Progent specializes in delivering advanced consulting solutions online and Progent's Microsoft-certified experts have provided cost-effective remote solutions to companies in every state in the U.S. Progent's clients include large enterprises, ISPs, local and state governments, small and mid-size businesses, and home offices. Remote support saves travel costs, resolves problems faster than

onsite service, and simplifies the coordination of large project teams. Progent also offers on-premises support in major metropolitan areas throughout the U.S.
