

Windows Server 2019

Windows Server 2019 Integration Consulting

Online and onsite expertise to help you build and manage on-premises, cloud-based, or hybrid solutions with Microsoft Windows Server 2019

Windows Server 2019

Windows Server 2019 is the Long-Term Servicing Channel (LTSC) perpetual-license release of Microsoft's flagship server operating system. Windows Server 2019 includes all the updates to Windows Server 2016 previously available only through the Semi-Annual Channel (SAC). Windows Server 2019 incorporates significant enhancements in scale, performance, manageability, security, application support, Linux compatibility, container technology, and hybrid integration of on-premises and cloud resources.

Top features for WS 2019 include Windows Admin Center for centralizing management and monitoring of hybrid local/cloud deployments, System Insights for utilizing modern predictive analytics to manage local environments, Windows Defender ATP Exploit Guard for host-intrusion prevention, container networking with Kubernetes, Cluster Sets for creating and managing large, high-availability scale-out clusters, and Storage Migration Service for streamlining the migration from legacy Windows servers.

Progent can help you integrate Windows Server 2019 with current releases of Microsoft's applications including Exchange Server, SQL Server, SharePoint, and Microsoft 365. Consulting and troubleshooting services for Windows Server 2019 are available online and Progent also offers on-premises consulting in major metropolitan areas across the United States.

Progent can assist with any phase of your Windows Server 2019 migration including solution design, site prep, project planning, cybersecurity, pilot validation on premises or at Progent's test lab, virtualization architecture and deployment, cloud integration, and disaster recovery planning. Progent can provide help with occasional technical obstacles or full project management outsourcing or co-sourcing services.

Examples of Progent's Windows Server 2019 Integration Services

Progent has experience providing a broad range of Windows Server 2019 integration services including:

- Setting up Hyper-V Containers for secure isolation of applications
- Integrating server clusters with improved resiliency against network and storage failures
- Using the new Storage Migration Service to cut the time and cost of migration to WS 2019
- Configuring Exchange Server 2019 Mailbox and Edge Transport server roles and management tools
- Deploying a unified security solution to protect endpoints, cloud workloads, containers, identity, IoT

Online Consulting Experts

Progent specializes in delivering advanced consulting solutions online and Progent's Microsoft-certified experts have provided cost-effective remote solutions to companies in every state in the U.S. Progent's clients include large enterprises, ISPs, local and state governments, small and mid-size businesses, and home offices. Remote support saves travel costs, solves problems faster than onsite service, and can simplify the coordination of large project teams. Progent also offers on-premises support in most major metropolitan areas throughout the U.S.
